

DEEP KAMAL GUPTA

7080253580 | deepkamalgupta13@gmail.com | [LinkedIn](#) | [GitHub](#) [LeetCode](#)

EDUCATION

Khawaja Moinuddin Chishti Language University

Lucknow, Uttar Pradesh

Bachelor of Technology (B.Tech) Computer Science and Engineering with AI & ML (CGPA : 8.3) Aug. 2023– May 2027

Relevant Coursework:

Data Structures & Algorithms (C++), Machine Learning, Probability & Statistics, Linear Algebra, Artificial Intelligence

TECHNICAL SKILLS

Languages: Python, C++, SQL, JavaScript, HTML/CSS

Machine Learning & AI: Machine Learning, Deep Learning, NLP, Generative AI

Frameworks & Tools: TensorFlow, PyTorch, FastAPI, Flask

GenAI & LLM Tools: LangChain, Hugging Face Transformers, Libraries: pandas, NumPy, Matplotlib, scikit-learn

Developer Tools: Git & GitHub, Docker, Google Cloud Platform, Google Colab, Kaggle, OpenAI, VS Code

HACKATHON

Smart India Hackathon

Team Leader

- Designed and developed a CNN-based classification system to analyze micro-Doppler signatures, accurately distinguishing between drones and birds for enhanced surveillance accuracy.
- Built a scalable solution for a national-level hackathon, enabling seamless integration with existing radar and surveillance systems in airport and defense environments.

Samsung Innovation Campus (SIC)

Team Member

- Developed an AI-integrated healthcare web application during the Samsung Innovation Campus Hackathon, aimed at assisting doctors in streamlining patient care and decision-making.
- Collaborated with a team to design and implement AI-driven features, enhancing efficiency and usability of the healthcare solution within a 3-day development cycle.

INTERNSHIP

Foundations of Artificial Intelligence

April 2025 – May 2025

Edunet Foundation

- * Completed a 4-week intensive internship on Foundations of Artificial Intelligence at Edunet Foundation, gaining hands-on experience in machine learning, data analysis, and model development.
- * Applied AI/ML techniques to solve real-world problem statements, including data preprocessing, feature engineering, and building predictive models using Python-based tools.

PROJECTS

AnimateX- Smooth Web Animation Interface | *JavaScript, HTML/CSS*

- Built a highly interactive, responsive website with advanced CSS and JavaScript animations, delivering a smooth and engaging user experience.
- Integrated dynamic elements and scroll-based interactions, improving usability, visual appeal, and cross-device compatibility.

Placement Prediction ML Model (Google Colab) | *Achieved 90% accuracy*

2026

- Developed a Machine Learning model to predict student placement outcomes using features like CGPA, aptitude, and skills, applying data preprocessing, feature engineering, and model optimization techniques.
- Performed end-to-end ML workflow including EDA, visualization, model training, and evaluation using Python (pandas, scikit-learn) on Google Colab, ensuring accurate and reliable predictions.

ACHIEVEMENTS

- Generative AI – Microsoft & LinkedIn**
- Yuva AI for All*
